Jessica Michelle Farias Rosado

Mechatronic Engineer & Full-Stack Developer

Portfolio | GitHub| LinkedIn

SKILLS

Languages: JavaScript | React & Redux | Next.js | Three.js | Golang | Java | C# | SQL | C++ | Shell (Sh) | Ladder Logic | AWL | G-Code
Design: Photoshop | Adobe Illustrator | Canva
Styles: SASS | CSS | Semantic UI | Bootstrap | GM3
Cloud: AWS (EC2, S3, Lambda, RDS, IAM, VPC, CloudWatch) | Google Cloud Platform (Compute Engine, App Engine, Cloud Storage, BigQuery, Pub/Sub)
Database: PostgreSQL | MySQL | SQLite | MongoDB | Firebase | Redis
DevOps & Tools: Docker | Jenkins | Kubernetes | OpenShift (Kubernetes) | Netlify | Heroku | Git | GitHub | Bitbucket
Other: SolidWorks | Artcam | Mastercam
Technologies of Choice: Golang | React & Next.js
Currently Learning: AI | Generative AI (Gemini | Vertex AI)

PERSONAL PROJECTS

Full Stack Developer
Teravision Games —Developed a frontend application to showcase Teravision's games, featuring an interactive timeline built with JavaScript to highlight the company's milestones. (Photoshop | Illustrator | React | JS)

Orrery app— Created an interactive orrery web application in just 3 days as part of the NASA Apps Challenge 2024. (React | NextJs | Typescript | ThreeJS)

EXPERIENCE

GOOGLE (Cloud Privacy Operations & Engineering Team) — Remote
Software Developer — March 2023– Today

- Streamlined privacy review processes for GCP product launches by building intuitive internal tools.
- Enhanced efficiency in addressing privacy questions with an AI-powered tool, minimizing manual effort through automation.
- Centralized ML model management by creating a unified repository to provide seamless access to model metadata of internal launch management tools used across GCP.

MILLICOM (TIGO) — Remote
Golang Developer — May 2022– March 2023

- Code standardization and improvements to make code readable, easy to maintain and increase overall performance.
- Amazon Web Services for backend implementation (RDS, EC2,Lambda,SQS, CloudWatch, S3, System Manager)
- ElasticSearch usage and implementation for Golang projects.

TRIBAL WORLDWIDE GUATEMALA (BI Banking Guatemala) — Remote
Full Stack Developer — April 2021– May 2022

- Tunneling with ssh connection, shell commands, create and deploy projects to Openshift (kubernetes)
- Created common pipelines as CI/CD on existing projects to automatically triggered by commit on Bitbucket/Github repositories.
- New features on existing Golang microservices
- Tested golang projects using interfaces, different consumers or mocks
- Implemented Golang Integration broker with different sources of user information and a dynamically handling and incrementing user's data

EDUCATION

UNIVERSITY AUTONOMOUS OF YUCATAN (UADY) — January 2012 – January 2019
Mechatronic Engineering, Bachelors

- Developed mobile and desktop applications using Visual Studio and PostgreSQL and AndroidStudio.
- Worked with a variety of languages for devices such as micro-controllers or PLCs
- Worked with both local hosting and cloud storage
